PROFESSIONAL SUMMARY

Hands-on experience building **Generative AI applications**, **LLM-powered workflows**, and **multi-agent systems** using Python and prompt engineering. Proficient in designing automated ETL pipelines and REST API integrations for scalable, real-time data processing. Strong command over SQL, Power BI, Tableau, and Excel, enabling clear, actionable business intelligence. Skilled in machine learning model development, achieving up to **95% accuracy** in classification tasks.

TECHNICAL SKILLS

AI & MACHINE LEARNING

Generative AI, LLM Applications, Prompt Engineering, CrewAI, Multi-Agent Systems, NLP, XGBoost, Scikit-Learn, Transformers

LANGUAGES & DATABASES

Python, SQL, MySQL, PostgreSQL, Supabase, Vector Embeddings, Data Modeling

VISUALIZATION & BI

Power BI (PL-300), Tableau, Streamlit, Matplotlib, Seaborn, Advanced Excel, Pandas, NumPy

CLOUD, TOOLS & PIPELINES

Git, GitHub Actions (CI/CD), REST APIs, GCP BigQuery, Azure, Jupyter Notebook, ETL Automation

WORK EXPERIENCE

Schneider Electric — Data Analyst Intern

Jun 2024 – Jul 2024 | Chennai, India

- Built interactive **Power BI and Tableau dashboards** to track KPIs across multiple business units, delivering real-time visibility into operational performance trends to stakeholders.
- Cleaned, transformed, and validated multi-source enterprise datasets using **SQL and Excel**, improving reporting accuracy and reducing manual data preparation cycles.
- Collaborated closely with cross-functional engineering and management teams to translate complex business requirements into actionable data visualizations.

FEATURED PROJECTS

1. Multi-Agent Enterprise Software Development Crew

CrewAI • GenAI

- Architected an autonomous multi-agent Generative AI ecosystem using **CrewAI and Groq API** to automate software specification, coding, and review workflows through orchestrated LLM agents.
- Engineered an interactive **Streamlit dashboard** for dynamic agent role orchestration, execution monitoring, and secure API key configuration.

Python CrewAI Groq LLM API Streamlit Prompt Engineering

2. TalentRadar AI — GenAI Job Market Intelligence Pipeline

ETL • LLM Analytics

- Engineered an end-to-end GenAI data pipeline extracting, parsing, and normalizing global tech job postings via LLM prompt engineering and semantic normalization.
- Implemented scalable ETL workflows with **Supabase (PostgreSQL), REST APIs, and GitHub Actions** for automated daily data harvesting.
- Developed an analytics dashboard in **Streamlit** delivering real-time skill demand forecasts and salary intelligence.

Python Groq API Supabase (PostgreSQL) GitHub Actions Streamlit

3. Telecom Customer Churn Prediction & Analytics Dashboard

ML • 95% Accuracy

- Trained and optimized an **XGBoost classification model** reaching **95% accuracy** for predicting customer attrition risk.
- Conducted comprehensive exploratory data analysis, feature engineering, and categorical encoding on customer demographic datasets.
- Deployed a **Streamlit** decision-support tool enabling business teams to explore high-risk customer segments and simulate retention strategies.

Python XGBoost Scikit-Learn Pandas Streamlit

4. Hallucination Detector in Chatbot

NLP • LLM Evaluation

- Constructed an NLP-driven evaluation framework to detect hallucinations and measure factual consistency in generative AI outputs.
- Benchmarked over **1,000+ LLM responses** to identify failure modes, improving consistency and guardrail fidelity.

Python NLP Transformers LLM Benchmarking

EDUCATION & CERTIFICATIONS

B.Tech — Artificial Intelligence & Data Science

Panimalar Engineering College, Chennai, India

Oct 2022 – Apr 2026 CGPA: 8.08 / 10

Generative AI Mastermind — Outskill

Microsoft Certified: Power BI Analyst (PL-300) — Microsoft

Google Cloud Data Analytics Certification — Google Cloud

Generative AI for Developers — IIT Patna (Pursuing)

Data Analytics Job Simulation — Deloitte × Forage
